

## DEGA STRIP

### Preparation for the realization of removable floors.

**DESCRIPTION:** Dega Strip is applicable on surfaces of various nature and easily removable thanks to the use of a special detaching primer that guarantees excellent adhesion and, at the same time, it's easily removable with the aid of steam or hot air, without damaging the treated surfaces.

**EMPLOYMENTS:** to cover existing floors with temporary floorings in rooms for rent, Fairs, exhibitions or where is not possible to ruin the old flooring.

**APPLICATION:** clean and degrease the surfaces to be treated. Laying Agente Distaccante. Apply one coat of Stabil-RT. To increase the consistency of the final flooring usually is applied a laying of Gel Coat dusted with quartz. At this point, is possible to apply over Dega Strip the normal cycle of the flooring of your choice (Dega Spatolato, Dega Art, etc).

**REMOVAL:** to remove Dega Strip is sufficient to weaken one of the extreme edges with the heat and remove with the possible aid of steam, hot water or hot air. Clean later the treated surface with our cleanser AP 10 or AP 98 removing any residue with the aid of a brush machine. The surface is then restored to its original state, intact and unaltered.

### DATI TECNICI:

Temperature limit of exercise	- 10°C + 60°C
Least temperature of application	+ 10°C + 35°C
Dessiccation of Agente Distaccante	About 2/4 h in operation of the temperature.
Dessiccation of Stabil-RT	Aboutn 4 h at 20°C
Complete hardening	About 8/12 h
Application	Brush or roll
Time of storage at 20° C	About 12 monts

The values indicated mean tests averages. What indicated about the method of use and the results obtainable with our product correspond to our experiences, without however constituting our use and responsibility. Therefore, the sale of our product is not covered by guarantee with regard of application and is carried out with the understanding that the user will determine the suitability.
